

ECRES 2018

25-27 June 2018 Istanbul / Turkey

VI. European Conference on Renewable Energy Systems

Conference Information

Title: 6th European Conference on Renewable Energy Systems

www.ewres.info

Proceedings type: It is not indexed. It is not open source. Delivered electronically to authors. Includes only very short forms of papers and abstracts.

Conference Location: Istanbul, Turkey

Estimated Participants: 300 (80% international)

Conference Dates: 25-27 June 2018

Special Issue Camera Ready Paper Submission Date: 1 September 2018 (Estimated)

Special Issue Publication Date (after peer review by journals): 15 February 2019 (Estimated)

Special Session Information

Title: Energy Informatics

Paper Amount: 20 Papers

Proposed Guest Editor:

Assoc.Prof.Dr. Mehmet Tekerek (Kahramanmaraş Sütçüimam University), Turkey, tekerek@gmail.com

Energy Informatics

Special Session Proposal

This session focuses on Energy Informatics. Due to the increasing importance of producing and consuming energy more sustainably, Energy Informatics has evolved into a thriving research area. How to leverage information and communication technology to improve energy efficiency, and to integrate decentralized renewable energy sources into the power grid will be the main research questions in the Energy Informatics.

Topics will include (but will not be limited to):

Energy Informatics

Smart Grid

Internet and Energy Network

Energy Infrastructure

IoT and Energy

Bigdata and Energy

Next Generation Energy Systems

Energy Storage and Battery Management

Smart Metering

Privacy Preserving in Energy Systems
